

ETAMAX

ESA Business Incubation Centre Darmstadt managed by cesah

Profile

etamax has a long standing experience working for customers in the aerospace, transportation and automobile industry. With a large expertise in GNSS navigation services, we are a premium member of GAUSS providing support in the

certification of safety relevant Galileo applications. We were founded 1997 in Braunschweig, Germany. GNSS applications and development projects are performed in the Darmstadt Office established in 2007.

Products and Services

etamax provides services in the fields of Software Engineering, Verification and Validation as well as Aerospace Engineering. G-WaLe is a water level measurement system. The solution is based on mobile floaters with integrated GNSS receivers. The aim of the project was to develop and apply a mobile self-contained water level measurement device using Global Navigation Satellite Systems like GPS or Galileo.

The G-WaLe main system components are:

- a) Mobile Floaters,
- b) PC based software processing the data received from the floaters. This system is intended to support and improve current flood forecast infrastructures, being also small, cheap and easy to deploy.
